- Gujarati

### PROFILE

Passionate frontend developer with a solid foundation in HTML, CSS, and JavaScript, along with experience in creating responsive websites and interactive UI features using GSAP animations. Currently learning backend technologies like Node.js to transition into full-stack development. Eager to contribute skills to real-world projects, collaborate with teams, and continuously improve through self-learning.

### PROJECTS

- Food Ordering Website**
  - Built with HTML, CSS, and JavaScript, featuring admin panel and order management.
  - Implemented localStorage for persistent menu items and orders.
  - Designed with a fully responsive layout for mobile and desktop.
- Image Finder App**
  - Developed using JavaScript and Unsplash API for image search functionality.
  - Implemented keyword-based search and dynamic UI updates.
  - Styled for a clean, responsive user experience.
- GSAP Animation Website**
  - Created a landing page with scroll-triggered animations using GSAP.
  - Optimized for performance and mobile responsiveness.
  - Integrated smooth transitions and visual effects for engaging user interaction.

### CERTIFICATION

- YoLearned HTML, CSS, and JavaScript through structured self-study and practice projects.
- Currently learning backend development (Node.js, Express.js).
- Exploring advanced frontend animations and responsive design principles.
